Apps Used = (Jira Software - Zephyr Scale - Postman)

Milestone Description

Overview: This milestone focuses on API testing using demo services, leveraging Postman as the primary testing tool. Participants will practice various aspects of API testing, including authentication and HTTP methods.

1. API Test Plan:
   - Develop a comprehensive API test plan within JIRA, outlining objectives, scope, and test scenarios.

   - Utilize Postman collections to organize and execute API test cases.

2. API Test Cases:

   - Create detailed test cases for each API within JIRA, covering positive and negative scenarios.

- Execute and manage API test cases using Postman and integrate results into JIRA.
